Technical Data Sheet

SmartSpace Storage System

APPLICATION:

The SmartSpace storage system is compatible with SmartShelf, 4D Wide Span, Cabinet style case type or any other shelving or pallet racking on the market. It was developed specifically for various light-duty applications.

TECHNICAL SPECIFICATIONS:

The SmartSpace storage system is able to withstand up to 2,000 lbs (907kg) per bay of shelving, in basic configurations. Each shelving post is supported by two-wheel support sections to ensure the stability and rigidity of the system.

The three (3) inch high mobile base, as well as the mechanical column (for mechanically-assisted system), is constructed from galvanized steel and has very few welded connections.

The column and its mechanism are pre-assembled at the factory to reduce on-site installation time. The circular rail reduces friction on the wheels.

	Minimum and maximum dimensions			
	Minimum		Maximum	
Section width	20"	0.51 m	48" (4')	1.21 m
Section length	24" (2')	0.61 m	48" (4')	1.21 m
Carriage length ¹			288" (24')	7.3 m

¹ For a maximum carriage load of 16 000 lbs.
